

28 May 2010

Aim

The Trust's objective is to increase its total return above the benchmark index of 50% FTSE All-Share and 50% FTSE All-World Index (ex UK sterling adjusted) over the long term, by investing in UK and international securities. The strategy of the Trust is designed to meet the requirements of those seeking a single investment in a diversified and professionally managed portfolio.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including the balance of supply and demand in the market, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

The Trust seeks to enhance returns for its shareholders through gearing, in the form of long-term, fixed rate debentures. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments lose value. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

History

The Trust was formed from the Brunner family's interest in the sale of Brunner, Mond & Co, the largest of the four companies which came to form ICI in 1926. The Trust has been managed by RCM (a subsidiary of Allianz Global Investors formerly Kleinwort Benson) since inception.

Fund Managers' Review

Mark Lovett

Lucy MacDonald

May proved to be a difficult month for World Equity markets as the EU bail out of Greece, the leaking BP leased Deepwater Horizon Rig and the sustainability of a Hung Parliament in the UK dominated news headlines. After weeks of speculation, the EU formalised and approved a bail out plan worth 110 bn Euro to prevent Greece defaulting on its sovereign debt. The EU will guarantee loans for three years and for the first time, the ECB will buy government bonds to stabilise markets, with rescue packages conditional on approved fiscal austerity measures by the countries involved. In the US, the BP run oil well continued to spew oil into the Gulf of Mexico despite numerous attempts to cap the well. In the midst of the gloomy May news, US macro data provided some cheer and the G20 group of countries stated that 'global recovery is better than we expected'

The Brunner benchmark ended the month -5.9% for May, with the portfolio (-6.47% NAV) as gains made within the consumer space were offset by the materials holdings. The best performing names in the portfolio were Apple, which has recently overtaken Microsoft as the most valuable technology company in the world, US coffee giant Starbucks and Compass. Compass, the world's largest catering company announced that first half profits increased by 17% after gaining contract with companies such as Wells Fargo and Aviva. The worst performers were UK Aerospace manufacturer Cobham after the company highlighted a slow start to 2010 and flat H1 profit, International Personal Finance and ArcelorMittal.

²Source: Datastream as at 28.05.10. Calculated using the latest full year dividend divided by the current share price.

³A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. In line with current industry best practice NAVs are now shown that take into account the 'fair value' of debt. This means NAVs are calculated after allowing for the valuation of debt at fair value or current market price, rather than at final repayment value. NAVs with debt at market value provide a more realistic impact of the cost of debt, and thus a more realistic discount. It is the capital NAV that is shown, which excludes any income.

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Benchmark: 50% FTSE All-Share Index/50% FTSE All-World ex UK Index. Note the benchmark was 60% FTSE All-Share and 40% FT/S&P World Index (ex UK sterling adjusted) up to 26th March 2008.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

This investment trust charges 70% of its annual management fee to the capital account and 30% to revenue. This could lead to a higher level of income but capital growth will be constrained as a result. Your capital could also decrease if income paid out of capital exceeds the growth rate of the trust.
