Investment trusts are quoted companies listed on the London Stock Exchange. Their share price is determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. In line with current industry best practice NAVs are shown that take into account the 'fair value' of debt. This means NAVs are calculated after allowing for the valuation of debt at fair value or current market price, rather than at final repayment value. NAVs with debt at market value provide a more realistic impact of the cost of debt, and thus a more realistic discount.

Trust aim & characteristics

The Trust's objective is to increase its total return above the benchmark index of 60% FTSE All-Share and 40% FT/S&P World Index (ex UK sterling adjusted) over the long term, by investing in UK and international securities. The strategy of the Trust is designed to meet the requirements of those seeking a single investment in a diversified and professionally managed portfolio.

††The Trust also seeks to enhance returns for its shareholders through gearing, in the form of bank borrowings. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments do badly. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

Fund Managers' Review

The month of April saw good returns for Global Equity markets, with the composite benchmark returning 2.5%. Performance was driven by a better than expected earnings season and continued domestic and export strength in Europe and Asia. The portfolio outperformed the benchmark in April, with a return of 3.2%, as Spectris, Reed Elsevier and ABN Amro all performed impressively, the latter after the bid from Barclays. Toyota Motor, Informa and BHP Billiton were the Trust's worst performers in the period. We believe Monetary policy and strong earnings growth will continue to support the markets in the near future.

Geographical breakdown

Source: Allianz Global Investors as at 30.04.07. Changes in rates of exchange may cause the value of investments and the income from them to go down or up.

Fund Performance

Source: Allianz Global Investors/ Russell/ Mellon. 30th April 2002 to 30th April 2007. Total return, net income reinvested, calculation indexed. UK Sterling.

Please remember that past performance is not a guide to future performance. The value of an investment and the income from it can fall as well as rise as a result of market or currency fluctuations and you may not get back the amount originally invested. This investment trust charges 70% of its annual management fee to the capital account and 30% to revenue. This could lead to a higher level of income but a lower capital return.

Standardised Past Performance

From to	29/03/2002 to 31/03/2003	31/03/2003 to 31/03/2004	31/03/2004 to 31/03/2005	31/03/2005 to 31/03/2006	31/03/2006 to 31/03/2007
Share Price	-33.8%	19.5%	14.0%	45.4%	7.2%

History

The Trust was formed from the Brunner family's interest in the sale of Brunner, Mond & Co, the largest of the four companies which came to form ICI in 1926. The Trust has been managed by Allianz Global Investors (formerly Kleinwort Benson and now part of Allianz) since inception.

Launch Date: 1927 **Wind-up Date:** None
