This Trust seeks to enhance returns for its shareholders through gearing, in the form of bank borrowings. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments do badly.

The Brunner Investment Trust PLC

Fund Managers' Review

Global equity markets continued to show positive returns in June as a combination of lower oil prices, fewer geopolitical concerns and a reassurance on the rate of US interest increases, all helped the composite benchmark rise 2.2% in Sterling terms.

Among the portfolio's top performance contributors was the Leisure and Hotels sector with Intercontinental Hotels rising 11.3%, as data indicated that the travel and hotel industry was performing well. A faller last month was the portfolio's holding in hedge fund manager Man Group; exposure has since been reduced as weak performance from its flagship fund left performance fee income expectations looking over-optimistic.

Portfolio strategy going forward remains focused on investing in quality companies with strong business models that will outperform in the current economic environment.

Fund Performance

Source: Russell/Mellon/Allianz Dresdner Asset Management. 30th June 99 to 30th June 04, Total Return, net income reinvested, calculation indexed. UK Sterling. Please remember that past performance is not necessarily a guide to future performance. The value of an investment and the income from it can fall as well as rise as a result of market or currency fluctuations and you may not get back the amount originally invested. This investment trust charges 70% of its annual management fee to the capital account and 30% to revenue. This could lead to a higher level of income but a lower capital return.
