Investment trusts are quoted companies listed on the London Stock Exchange. Their share price is determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. In line with current industry best practice NAVs are shown that take into account the 'fair value' of debt. This means NAVs are calculated after allowing for the valuation of debt at fair value or current market price, rather than at final repayment value. NAVs with debt at market value provide a more realistic impact of the cost of debt, and thus a more realistic discount.

Trust aim & characteristics

The Trust's objective is to increase its total return above the benchmark index of 60% FTSE All-Share and 40% FT/S&P World Index (ex UK sterling adjusted) over the long term, by investing in UK and international securities. The strategy of the Trust is designed to meet the requirements of those seeking a single investment in a diversified and professionally managed portfolio.

††The Trust also seeks to enhance returns for its shareholders through gearing, in the form of bank borrowings. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments do badly. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

Fund Managers' Review

Global equity markets traded well over the month, with the US Dow Jones Index hitting a new all time high. Overall we saw a +2.4% return from the Trust's global benchmark. Cyclical sectors performed the strongest in October with basic resources, autos, industrials and oils among the best performers.

Within the portfolio, notable out-performers included Informa, the UK media company, as speculation continued over a possible takeover. In resources we saw the holdings in Rio Tinto, Xstrata, and Teck Cominco all performing well on the back of increasing optimism for the outlook for metals prices. On the negative side the principal underperformers were in the traditionally defensive sectors of pharmaceuticals and consumer staples with holdings such as Pepsico unable to outperform the wider market.

The economic outlook remains broadly positive, concerns persist over the strength of the US economy, an underweight area for the Trust, however in the UK, strong manufacturing and retail surveys point to a healthy outlook with the only concern being inflation and interest rates.

Geographical breakdown

Source: Allianz Global Investors as at 30.10.06 Changes in rates of exchange may cause the value of investments and the income from them to go down or up.

Fund Performance

Source: Allianz Global Investors/ Russell/ Mellon. 31st October 2001 to 31st October 2006, Total Return, net income reinvested, calculation indexed. UK Sterling.

Please remember that past performance is not a guide to future performance. The value of an investment and the income from it can fall as well as rise as a result of market or currency fluctuations and you may not get back the amount originally invested. This investment trust charges 70% of its annual management fee to the capital account and 30% to revenue. This could lead to a higher level of income but a lower capital return.

Standardised Past Performance

From to	28/09/2001 to 30/09/2002	30/09/2002 to 30/09/2003	30/09/2003 to 30/09/2004	30/09/2004 to 30/09/2005	30/09/2005 to 29/09/2006
Share Price	-25.8%	10.9%	12.2%	30.3%	16.4%

History

The Trust was formed from the Brunner family's interest in the sale of Brunner, Mond & Co, the largest of the four companies which came to form ICI in 1926. The Trust has been managed by Allianz Global Investors (formerly Kleinwort Benson and now part of Allianz) since inception.

Launch Date: 1927 **Wind-up Date:** None
