

28 August 2009

Aim

The Trust's objective is to increase its total return above the benchmark index of 50% FTSE All-Share and 50% FTSE All-World Index (ex UK sterling adjusted) over the long term, by investing in UK and international securities. The strategy of the Trust is designed to meet the requirements of those seeking a single investment in a diversified and professionally managed portfolio.

Risks & Features

Investment trusts are quoted companies listed on the London Stock Exchange. Their share prices are determined by factors including demand, or lack of, which means that the shares may trade below (at a discount to) or above (at a premium to) the underlying net asset value.

The Trust seeks to enhance returns for its shareholders through gearing, in the form of long-term, fixed rate debentures. Gearing can boost the Trust's returns when investments perform well, though losses can be magnified when investments lose value. You should be aware that this Trust may be subject to sudden and large falls in value and you could suffer substantial capital loss.

History

The Trust was formed from the Brunner family's interest in the sale of Brunner, Mond & Co, the largest of the four companies which came to form ICI in 1926. The Trust has been managed by RCM (a subsidiary of Allianz Global Investors formerly Kleinwort Benson) since inception.

Fund Managers' Review

Mark Lovett

Lucy MacDonald

Global equity markets continued to rise in August, with the markets again led by the financial companies. The much watched ISM manufacturing index advanced for the seventh consecutive month to its highest reading since August 2008. New home sales also surged by 10% and the S&P Home Price Index advanced sharply.

Interest rates were kept on hold across the major developed countries as expected but the Bank of England surprised investors by increasing its Quantitative Easing program by 50bn. Second quarter UK GDP data was much worse than expected and the sharp fall experienced by the Shanghai Stock Exchange (20% in August) suggests that although things are improving, investors must remain cautious.

The portfolio slightly outperformed its benchmark during August. The best performers within the portfolio were Intermediate Capital Group, which surged 50% after a successful rights issue to fund new investments, UK engineering group Melrose and Informa. The underweight in Banks has now been closed after purchasing ANZ Bank, which we believe has a strong growth profile due to its Asian exposure and cash on the balance sheet and adding to Wells Fargo. China Life and China Mobile also were two of the worst performing stocks in the portfolio as they were dragged down by fears that Chinese growth targets are unsustainable.

Key Information

Total Assets:	£243.3m

²Source: Datastream as at 28.08.09. Calculated using the latest full year dividend divided by the current share price.

³A trust's net asset value (NAV) is calculated as available shareholders' funds divided by the number of shares in issue, with shareholders' funds taken to be the net value of all the company's assets after deducting liabilities. In line with current industry best practice NAVs are now shown that take into account the 'fair value' of debt. This means NAVs are calculated after allowing for the valuation of debt at fair value or current market price, rather than at final repayment value. NAVs with debt at market value provide a more realistic impact of the cost of debt, and thus a more realistic discount. It is the capital NAV that is shown, which excludes any income.

Changes in rates of exchange may cause the value of investments and the income from them to go down or up.

How to Invest?

The Trust is a UK public limited company traded openly on the stock market. You can purchase shares through a stock broker.

RIC: BUT **SEDOL:** 0149000 **ISIN:** GB0001490001

Shares in the Trust can be held within an ISA and/or savings scheme and a number of providers offer this facility. A list of suppliers is available on our website www.rcm.com/investmenttrusts or from the AIC at www.theaic.co.uk

Please note: Our Investment Trust Savings Plan was closed and transferred to Alliance Trust Savings on 29 February 2008. Alliance Trust can be contacted on 01382 573 737 or contact@alliancetrust.co.uk

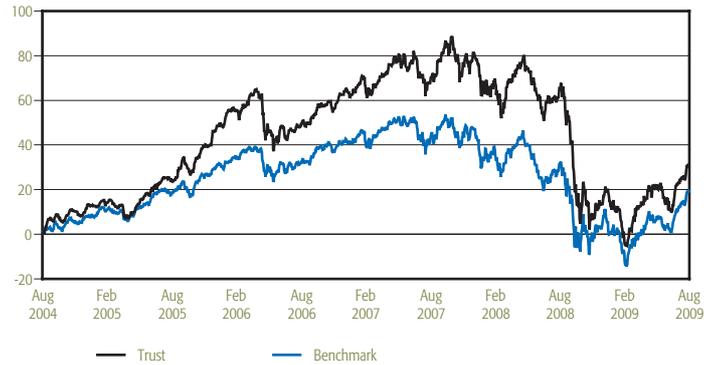

RCM Advantage

RCM and its predecessors have been managing investment trusts since 1889, providing investors with access to investment markets around the world through professionally managed portfolios. Each trust benefits from the expertise of the RCM fund managers yet, as a company listed on the London Stock Exchange, it is independent and is overseen by its own Board of Directors.

RCM is the global equity specialist within Allianz Global Investors. With offices strategically located in the US, Europe and Asia, RCM uses its global research platform to search out investment opportunities.

Source: Lipper, percentage growth, mid to mid, capital return, to 28.08.09
Benchmark: 50% FTSE All-Share Index/50% FTSE All-World ex UK Index. Note the benchmark was 60% FTSE All-Share and 40% FT/S&P World Index (ex UK sterling adjusted) up to 26th March 2008.

Standardised past performance figures comply with the Financial Services Authority's regulations to enable investors to compare different products from different providers.

Past performance is not a reliable indicator of future performance. You should not make any assumptions on the future on the basis of performance information. The value of an investment and the income from it can fall as well as rise as a result of market fluctuations and you may not get back the amount originally invested.

This investment trust charges 70% of its annual management fee to the capital account and 30% to revenue. This could lead to a higher level of income but capital growth will be constrained as a result. Your capital could also decrease if income paid out of capital exceeds the growth rate of the trust.
